# **Newsletter July 2018**

Optimal Personalised Treatment of early breast cancer using Multi-parameter Analysis

### Recruitment update

Total recruitment is currently 524

After a bumper May, June was a bit quieter on the recruitment front with **34 patients** randomised.

Top recruiters were **Belfast City**, **George Eliot** and **The Christie** Hospitals with 3 patients each.

Please continue to screen and approach potential participants.

#### July 2018—Recruitment tip of the month: Prosigna Testing – The patient sample

Let the patient know that taking part in OPTIMA won't involve any additional procedures as the sample used for the Prosigna test will come from the tumour that has already been removed.

"We'll send of a sample from the tumour that we've already taken, so there's nothing extra needed from you."

#### **Data Queries**

The OPTIMA Team has recently developed a new data-tracking database. As a result, begin sending out queries relating to both the **Prelim** and **Main** OPTIMA Case R (CRFs).

The queries will be sent in the form of a PDF report and our aim is to send these out on a monthly basis. Please keep an eye out for these reports. We would appreciate it if you could try to return the resolved queries within a 2 week timeframe, but remember,

the OPTIMA Team is always happy to assist if you need any help or guidance.

#### **OPTIMA Regional Recruitment Meetings (CDP accredited)**

The OPTIMA team has been on the road meeting with colleagues in Scotland, the East of England and North wales...

Next stop is South Wales and further meetings are planned. It's been really useful hearing first-hand about your experiences and having the opportunity to share what we are learning about recruitment from the Qualitative Recruitment Study.
